Right mouse button: add/remove room from level

Rules:

• Rooms must be horizontally or vertically connected

All rooms must form a connected chain

Bad

Good

Keyboard:

- ctrl-z: undo last edit (50 undo's available).
- ctrl-y: redo last edit.
- ctrl-s: quick save using current file or level name.
- f1/f2: traverse themes
- f3/f4: room size zoom
- f5: export level map
- f9/f10: load/save level

Active room grid:

- left mouse click: select current room.
- right mouse click: add or remove a room from the level
(all tools and enemies will be released, but brick layout will remain until the next save or quick)

Edit tool area:

- left mouse click: select current tool.
- rectangle fill can be selected together with one of the two bricks. Using it will fill an block-type area surrounding the mouse pointer. Fill will stop when the same type of brick is encountered.
- rectangle fill with tolerance won't overwrite any brick or ladder.

Viewport/edit window:

- drag&drop an .elg level file: load the file.
- right mouse click/drag: use current tool to add items.
- left mouse click&drag: move the level inside the viewport.
- scroll wheel: zoom in and out, brick sized zooming.

Extra tool area:

- 1) play button
- 2) show manual
- 3) show room outline
- 4) show brick outline
- 5) clear current room - see selected in active room grid
- 6) clear entire level
